Re: 3M Standard Range Shortening Monitor (SRSM) and Low Range Shortening Monitor (LRSM) Strips Shipping Condition

To Whom It May Concern,

Based on the results from a study we conducted in our laboratory, the data indicated that the 3M Standard Range Shortening Monitor (SRSM) and Low Range Shortening Monitor (LRSM) Strips do not need to be shipped in a cooling media (i. e. ice, dry ice, refrigeration), provided that the temperature of the shipping container does not exceed 120°F and the products do not reside in the container for more than two weeks.

Best Regards,

*Vangcha Lo*
